Professional Summary

Data Analyst and AI/ML Engineer with experience in **data analytics**, **machine learning**, and **Generative AI**. Proficient in **Python**, **SQL**, **Power BI**, and **LLM-based frameworks**, with a proven ability to build **predictive models**, deliver **actionable insights**, and develop **AI-driven solutions**. Skilled in leveraging data to support **business decision-making**, improve operational efficiency, and drive measurable outcomes.

Technical Skills

Languages: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL, PySpark (familiar), Hive (familiar)
Machine Learning: Logistic Linear Regression, Decision Trees, Random Forest, SVM, KNN, Gradient Boosting, Clustering, Isolation Forest
GenAI/NLP: LangChain, RAG, Prompt Engineering, FAISS,LangChain agent, ReAct Agent
Cloud AWS: AWS (Certification in Progress), Amazon S3, EC2, IAM, Lambda, CloudWatch (familiar)
Tools: Power BI, Git
Databases: MySQL, SQL Server, MongoDB, MS SQL Server
Concepts: Data Analysis, Statistical Analysis, Testing, Data Visualization, Feature Engineering, Model Evaluation
Data Visualization: Power BI (Dashboards, KPI Tracking), Matplotlib, Seaborn

Professional Experience

IDBI Intech | *Data Scientist Intern (AML Department)* **Dec 2025 – Apr 2026**

- Built anomaly detection models (Isolation Forest), improving fraud detection accuracy by **10–12%**
- Reduced false positives by **12–15%**, enhancing compliance monitoring efficiency
- Processed **100K+ transactions** using SQL and Python with RFM-based pipelines
- Automated reporting workflows, reducing manual effort by **40%**

Unified Mentor | *Data Analyst Intern* **May 2024 – Jul 2024**

- Analyzed **100K+ records** using Python and SQL to extract actionable business insights
- Developed **Power BI dashboards** for KPI tracking and performance monitoring
- Automated reporting pipelines, saving **10+ hours per week**

AoT Solutions | *Software Engineer Intern* **Jul 2022 – Aug 2022**

- Optimized SQL queries, improving execution time by **20%**
- Improved backend performance and database efficiency for faster data retrieval

Projects

LLM-Based AI Chatbot (Python, Flask, LangChain, FAISS, Groq, MongoDB)

- Developed an AI-powered chatbot using **LangChain**, **Groq Llama 3.3-70B**, and a **FAISS-based Retrieval-Augmented Generation (RAG)** pipeline for semantic document retrieval.
- Built a LangChain agent with custom retrieval and calculator tools, enabling context-aware question answering, mathematical computations, and multi-turn conversations.
- Designed and deployed **Flask REST APIs**, integrated **MongoDB** for persistent conversation history and session management, and implemented dynamic prompt construction using retrieved context.

AML Fraud Detection System (Machine Learning)

- Developed ML models (Logistic Regression, SVM, Gradient Boosting)
- Achieved **90-95% accuracy** through feature engineering and hyperparameter tuning
- Improved precision and recall using robust evaluation techniques, **0.72 ROC-AUC**

Customer Churn Prediction (ML)

- Built churn prediction model with **˜90% accuracy**
- Assessed performance using precision, recall, F1-score, and ROC-AUC and Identified key churn drivers to support targeted retention strategies

Sales Analytics Dashboard (Power BI)

- Designed interactive dashboards for KPI tracking,business insights and Automated reporting workflows, saving **weekly**

Education

BTech. in Computer Engineering | Pillai College of Engineering **2023 – 2026**
Diploma in Computer Technology | Bharati Vidyapeeth **2020 – 2023**

Certifications

- IBM – Python 101 for Data Science (Cognitive Class)
- Google Cloud – Career Launchpad Data Analytics
- Deloitte – Data Analytics Simulation
- Quantium – Data Analytics Simulation

Key Traits: Growth Mindset, Quick Learner, Determined, Full Ownership, Strong Communication, Team Player, Flexible to Rotating Shifts
